Top Perceived Challenges in Nigerian Education

INSIGHTS

Key Insights from the Survey

- Most respondents are **students (57%)**, meaning results strongly reflect learner experiences.
- **Urban respondents dominate (59.6%)**, indicating rural education challenges may be under-reported.
- **Government schools are the most represented (62%)**, making their challenges critical to national policy.
- The average ratings reveal **moderate satisfaction**:
 - Teaching clarity: 3.33 / 5
 - Education quality: 3.20 / 5
 - Classroom comfort: 2.68 / 5
 - Learning materials: 2.89 / 5

This suggests education is **average but far from excellent**.

- Only **35.4% of parents consider school fees affordable**, highlighting a major economic barrier.
- The **top perceived problems** are:
 1. Funding & affordability
 2. Infrastructure & learning environment
 3. Teacher shortage & quality
- Student behaviour and home support were **least mentioned**, meaning stakeholders see the problem as **systemic**, not student-driven.

RECOMMENDATIONS:

Data-Driven Recommendations

Government & Policy Makers

- Increase funding and enforce transparent spending.
- Prioritize infrastructure upgrades in public schools.
- Invest in teacher training and welfare programs.

Schools

- Improve classroom comfort and access to learning materials.
- Integrate practical learning into curriculum delivery.

Technology & Innovation

- Expand digital learning tools, especially in rural schools.
- Provide subsidized internet and devices for teachers and students.

Parents & Community

- Strengthen parent-school collaboration to support learning at home
